

COVID-19

OFFICIAL NOTICE

Dear Valued Customer,

We are taking this opportunity to let you know where AMMSCO Limited stands amid current concerns around Coronavirus and what measures we've introduced to protect our customers and staff.

We are grateful to confirm that we've experienced NO cases of Coronavirus amongst our team and that recent events have had very little impact on our ability to fulfil orders. Notwithstanding, we have put measures in place by increasing our stock levels to ensure that we continue to provide a seamless service to your vessel. Over the past week, however, as the detection and confirmation of cases in the Caribbean continue to increase, we are anticipating deficiencies, especially with imported goods, cleaning and sanitation products and some staple items. We will continue to monitor developments and abide by the advice from the government and health bodies as the pandemic unfolds.

The well-being of our customers and staff is of the highest importance, so in addition to our usual high standards of hygiene, we have implemented a heightened cleaning and sanitation regime and strict rules on hand-washing and sanitising around our warehouse, offices and general public areas. We are also ensuring that all our food equipment and storage units, and food transport units are being sanitised regularly to reduce risk.

We will continue to do our best to ensure good supply without any significant adjustments on product, pricing and service to your teams. Should we be finding difficulty in sourcing a requested item we will offer an available alternative.

We trust that you understand the constraints Trinidad is experiencing, but wish to assure your team that we will continue to make every effort to support the good supply that you are accustomed to. Team AMMSCO is confident that we're doing everything in our power to meet this challenge with effective and proportionate response.

Kind regards,
The Management of AMMSCO Limited
